Electronic Timing

The 2011 event sees the return of electronic timing to the Sydney race. Chip timing ensures an accurate starting line-to-finish line time for each participant and reduces the amount of post-event work for the company captain. Timing chips will be attached to the runner numbers and should be distributed to each runner by the captain before you leave for the Centennial Park race site. Restating, please also insure that each participant wears his or her assigned bib. For safety reasons, bibs are non-transferrable.

Pulse Start System

The successful "pulse start" system will also return for the second year with runners will receiving colour-coded bib numbers. This procedure helps to ensure a more efficient start, a less congested race course, and a better chance for improved times for all runners. For this system to work most efficiently, it is important that the company captain – during the registration process – inform all team members to honestly project their finishing time.

Results

Individual runner finish times will be available online beginning on Thursday 10 November. The Captain Tools' results function provides you with the facility to easily determine and submit your most competitive scoring team combinations. Official results will be available once the eligibility of winning teams has been verified.

Race Beneficiary

The JPMorgan Chase Foundation, on behalf of the J.P. Morgan Corporate Challenge in Sydney, will make a donation to a local not-for-profit organisation. More information on this not-for-profit organization and the specific programs that will benefit from the donation will be shared with company captains in future communications and at jpmorgan.com/cc
